The 6W powered speaker is equipped with a 130mm full-range loudspeaker chassis and a 100V transformer with 3 power adjustments. The powder coated metal similar to RAL 9016 guarantees long-term stability.

Thanks to an innovative air flow system, the DL-E provides sound characteristics which are attributed to a conventional bass reflex speaker. An extremely flat construction method allows a low mounting depth of only 70mm, with less than 1 kg product weight. For additional safety a 4 pin-ceramic block and a thermal fuse are provided and the speaker chassis is impregnated against dampness. Protection class IP 21C secures the speaker against the impact of environmental influences.

Quick and easy mounting with spring clamps and short tension distance. Perfectly suitable for installations where the installation depth is very limited. In combination with the firedome FE-130-EN54 the speaker is compliant with the British Standard BS 5839, Part 8. Special paint of the speaker in 4-digit RAL- or NCS-colour available at extra cost. The innovative PET-plastic contact protection is included in the delivery and protected by an European patent (publication no. **2768238**).

This speaker is suitable for a ceiling strength of about 3 – 45 mm. Our specification is primarily related to solid ceilings, for ceilings with soft materials a higher ceiling thicknesses could be necessary. In addition, stronger cables and other fittings may also result in changes of the appropriate setup. With regard to the variety of materials and manufacturers, we recommend to build in a sample of the speaker to match the

Requirements accurately.
